

Final remarks:

Opinions about the presentations of China – which the best

the best:)

It's very hard too choose one of all presentation which will be the best. I love beautiful views. Landscapes in China are great. I dream about going to China. Besides, I like spending my free time outside... So - I chose the last presentation - Nature - as the best:) I find inspiring in people situation in Far East Culture. There are so many people. They have their own customs and tradition. It's the most outstanding thing in the world. So, wide diversity should teach us how we ought to be more tolerant. It can deepen our knowledge.

It's really simple *for* me to choose one presentation I love doing shopping so this presentation is the best for me. But I must say that all presentations were great and I got so much knowledge about China . I have always been interested in other cultures but now I know more about China than ever. Chinese people have so rich culture and history . What's more, I think that Radka is right saying about importance of tolerance because more and more foreigners are coming to Poland and we should see friends in them. It's really important to be tolerant because it gives us an opportunity to know something new about other cultures.
