

## **Comments on the presentations about Poland**

**The presentation is very informative and the layout and effects are very good.**

**But, the text was really a bit too long. There are so many names of different people that it was difficult to keep that on mind. But it was interesting.**

**Thank you!**

**In my opinion this presentation looks really nice! It's true that it has many slides and much text, but I think it isn't a drawback as everyone has a chance to find something in what she or he is interested in. It can be Polish culture, history, cuisine, sport and so on. As far as I'm concerned, the slides about tourist attractions are my favourite ones. There are many interesting photographs with beautiful and breathtaking views on them, so maybe because of this I like these slides very much. Furthermore I love travelling around Poland and thanks to this presentation and especially these slides I have had an opportunity to find out information about places which seem to be really worth visiting, and which I haven't seen yet!**

### **German presentation**

**I really like this presentation. It's quite short, clear and involves the most important information. I didn't know that 'Pretzel', which I like very much, comes from Germany. The Oktoberfest seems to be a curious event. I would like to watch or even take part in such a festival. :)**
